"As a primary teacher back home in Bhutan, I was looking for a course that could up-skill me in my industry."

I found the course was relevant to what I was looking for and ECU has a good reputation amongst the international student community, so it was the right choice.

My family has moved to Australia with me while I study, and it's a great place to raise kids with all the parks and playgrounds. The weather is really pleasant in Perth, there aren't weather extremes, so it's really comfortable all year all round. I was concerned about not finding the right food to cook with, but as it's such a multicultural city there was no problem finding the right ingredients. Overall, we enjoy living here as a family.
